---

FULL-STACK SOFTWARE ENGINEER

Senior full-stack software engineer with 10+ years of experience building production web applications and enterprise platforms. Experienced with React, Python, Flask, Ruby on Rails, MySQL, PostgreSQL, and AWS, with a strong background in AdTech, APIs, data processing, microservices, and enterprise integrations. Builds practical AI-assisted development workflows that improve planning, implementation, testing, and documentation.

Technical Skills

Frontend: React, React Native, JavaScript, HTML, CSS
Backend: Python, Flask, Ruby on Rails, Node.js, REST APIs
Databases & Data: MySQL, PostgreSQL, MongoDB, BigQuery, Pandas
Cloud & Tools: AWS, New Relic, Datadog, Git
Authentication: Auth0, Okta, OAuth
AI-assisted development: Claude Code (custom slash commands, skills, CLAUDE.md context files), spec-driven agent workflows, prompt/context engineering

AI Spec-Driven Development

Claude Code, custom commands, skills, and context files

- Built a reusable, spec-driven Claude Code workflow covering feature definition, planning, implementation, self-verification, documentation, manual testing, and handoff.
- Added explicit approval gates that require open questions to be resolved before planning or implementation, reducing unsupported assumptions.
- Divided implementation into small, independently verified checkpoints to keep AI-generated changes testable and reviewable.
- Kept Git operations human-controlled, requiring deliberate approval for branches, commits, and other version-control changes.

Professional Experience

INFILLION — Los Angeles, CA

Full-Stack Software Engineer | Mar 2022 – Aug 2026

- Built and maintained a production **white-label advertising platform** using **React, Flask, Python, MySQL, and AWS**.
- Developed full-stack features across React applications, Flask services, REST APIs, databases, and advertising workflows, including solutions supporting **Walmart**.

- Built data-processing and reporting workflows using **Python, Pandas, MySQL, BigQuery**, including ingestion, validation, deduplication, and processing of large advertising datasets.
- Supported enterprise authentication and SSO integrations using **Auth0 and Okta**.
- Troubleshot production issues across frontend, backend, database, authentication, and infrastructure layers while collaborating with engineering and DevOps teams.
- Leveraged **Claude for AI-assisted development** to accelerate implementation, debugging, refactoring, code analysis, and technical documentation.

GIMBAL — Los Angeles, CA
Full-Stack Software Engineer | May 2019 – Mar 2022

- Member of a **25-person engineering team** developing and maintaining a location-driven platform consisting of **60+ Ruby on Rails and React microservices**.
- Collaborated with DevOps to maintain production stability on **AWS**, using **New Relic and Datadog** for monitoring and troubleshooting.
- Led development of a **React Native** module for Disney and Burger King.
- Developed The Hub, Gimbal's next-gen campaign-management platform, using **React**.

TUO.IO — Los Angeles, CA
Ruby on Rails Developer — Part-Time | May 2020 – Aug 2023

- Developed and optimized a web application using **Ruby on Rails, ERB, JavaScript**.
- Built rapid prototypes and product demonstrations for business presentations.

I.AM+ — Los Angeles, CA
React / Ruby on Rails Developer | Feb 2015 – Apr 2019

- Developed applications for **OMEGA AI and BUTTONS Bluetooth earphones** using React and Ruby on Rails.
- Built user identity, device management, and music subscription features.

Additional Experience
APM Jewelry — Co-Founder | May 2005 – Dec 2013
Co-founded an e-commerce jewelry business; built and maintained its website and inventory management system.

Vitesse Semiconductor — Circuit & Layout Designer | May 1998 – Mar 2005

Projects & Open Source
dig-deep — Created a Ruby gem for nested hash lookups.
30 Seconds of Code — Contributed a JavaScript `dig` implementation.

Education
University of California, Los Angeles (UCLA)
B.S. Electrical Engineering
